11th Circular Economy Conference

Why This Matters

Across Africa, communities and businesses are navigating increasing global uncertainty—shifting trade dynamics, resource constraints, and economic pressure. In this context, **local resilience is no longer optional**.

The circular economy offers more than environmental benefits. It presents an **alternative system**—one that moves away from overproduction, overconsumption, and extractive growth, toward **thriving societies rooted in local value creation, resource consciousness, and collaboration**.

This conference is designed as a platform for practical dialogue, collaboration, and action to growing need to **simplify, localise, and activate circular solutions** that work within African realities.

Theme: **Resilience**

*Circularity is not just about managing resources—it is about **redefining how economies function and who they serve**.*

By focusing on local material flows, human-centered design, and collective action, this conference aims to move beyond ideas and **build the foundations of resilient**, inclusive, and regenerative economies across Africa.

The goal is simple: **connect the right people, around the right opportunities—and make it happen**.

11TH
**CIRCULAR
ECONOMY
CONFERENCE**

Objective

- Action Circularity Strengthen local economies through connected material flows
- Support inclusive job creation and entrepreneurship
- Cause collaboration across sectors and regions
- Simplify circularity language and tools for wider adoption

At its core, the event is about **making circularity tangible, practical, and human-centered**.

Question:
How does the circular economy function and who does it serve?

ENJOY THE EXPO WITH
SUSTAINABLE & CIRCULAR
IDEAS, PRODUCTS
INNOVATIONS AND
DESIGNS

This conference builds on years of convening in Southern and East Africa and responds directly to this moment: **less theory, more practice; less fragmentation, more collaboration**.

11th Circular Economy Conference | Programme

07:30 – 08:30	Registration	Guests Arrival and Registrations	Tea & Coffee Refreshments	MC Welcome
08:30 – 10:00	Opening Plenary	National Anthem & E.A Anthem	Welcome Remarks - KPP	Keynote Speeches
		Launch of the circle	Second-hand clothes Bale unpacking	Drummers entertainment
10:00 – 11:30	Breakout Sessions	The Social-Economic Side of Circularity: Systems & Material Flows	Blooming Conversation	Textile Circularity – the Second-Hand-Market (invite only)
11:30 – 12:30	Circularity in Action Expo	Story telling	EXPO Visits	
12:30 – 13:45	Local Lunch & EXPO	Voices from the ground	Innovations in the Spotlight	
13:45 – 14:00	Setting for Afternoon	Drummers entertainment		
14:00 – 14:45	Afternoon Plenary	Launch of National Circularity Strategy		
15:15 – 16:30	Afternoon Breakout Sessions	Capital in Motion: Making Circular Finance Happen	EPR Reality Check - Taking Stock of Kenya's EPR Journey	National Communications Strategy for Waste Segregation at Source
16:30 – 18:00	Closing + Expo	Wrap Up	Networking & Drinks

*Indicated prices are tax-exclusive. If you require an e-TIMS receipt, please contact the organiser **before making a purchase** to provide your KRA PIN and billing details.

11th Circular Economy Conference

Building Local Resilience Through Circular Systems

From Waste to Materials. From Challenges to Opportunities. From Policy to Practice.

When **participants arrive** at the Kenya Circular Economy Conference 2026, they won't be walking into a conference about waste. They will be stepping into a conversation about materials, social-economic opportunities, environmental solutions and open exchange of knowledge, insights, networks and inspiration.

Across Kenya, businesses, communities, innovators, policymakers, and entrepreneurs are already creating circular solutions. This conference brings these stories, systems, and opportunities together—not through theory, but through practical experiences, honest dialogue, and meaningful collaboration.

The focus is simple: **How do we build resilient local economies by seeing materials, people, and resources differently?**

Throughout the conference, participants will move through a series of interconnected experiences that demonstrate how circular economy is already creating jobs, reducing waste, strengthening businesses, and improving communities across Kenya.

Breakout Session

1

The Social-Economic Side of Circularity: Systems & Material Flows

2

Blooming Conversation – Horti-Cultural Expert Round Table (*invite only*)

3

Textile Circularity – the Second-Hand-Market

Topics | Breakout Sessions

The Social-Economic Side of Circularity: Systems & Material Flows

Real change happens when systems make it possible. This session **explores how communication, policy, incentives, and infrastructure can encourage source separation, responsible consumption, and new ways of thinking about materials.** Through community stories and honest conversations, participants will examine what it takes to make circularity work. The session also highlights how **businesses can exchange materials, repurpose by-products, extend product lifespans, and create value through collaboration.** Practical case studies, matchmaking opportunities, and a live exercise using a circular business canvas will help participants turn ideas into action and discover how stronger connections can unlock new circular opportunities.

Blooming Conversation

The Horti-Cultural expert round table on setting priorities and shaping a practical short term future plan on how to push circularity & sustainability beyond compliance in Kenya.

This is an invite-only session.

The logo for Florensis, featuring a stylized flower icon above the word 'Florensis' in a bold, black, sans-serif font.

Textile Circularity – the Second-hand Market

Kenya's second-hand textile sector is one of Africa's largest circular economy systems, creating jobs, extending textile lifespans, and providing affordable clothing to millions.

This **extended session presents initial findings from a new study** of the sector, examining working conditions, circularity, product quality, social and economic opportunities, environmental impacts, and key challenges.

Kenyan stakeholders and international experts will reflect on the findings, exploring implications for the future and priorities for action. The session opens with a live Mitumba showcase, including bale-opening demonstrations and an exhibition celebrating the value, quality, and diversity of Kenya's circular textile market.

Breakout Session

4

Capital in Motion: Making Circular Finance Happen

5

EPR Reality Check – Taking Stock of Kenya's EPR Journey

6

Kenya's National Communications Strategy for Waste Segregation at Source

Topics | Breakout Sessions

Capital in Motion: Making Circular Finance Happen

4

Circular economy is not a funding gap—it is a different way of creating value.

This session explores how SMEs can transition to circular business models, how investors can assess circular opportunities, and how corporates can support entrepreneurs solving sustainability challenges. Practical workshops and finance clinics will help turn ideas into action. This is a cross-sectoral session. On how circularity makes business sense and how viability and sustainability are grown. Led by the **The Circle (initiative of Climate KIC & Growth Africa)**—a growing community connecting circular economy innovators, businesses, investors and ecosystem partners across Africa.

EPR Reality Check – Taking Stock of Kenya's EPR Journey

5

Extended Producer Responsibility (EPR) is reshaping Kenya's plastics value chain, but what is the reality on the ground? This session provides a frank status update on implementation, lessons learned, emerging challenges and opportunities, and what is needed to ensure EPR delivers meaningful environmental, social and economic impact.

Bringing together **Kenya Plastics Pact members** & supporters, government, Producer Responsibility Organisations (PROs), the **Kenya Association of Manufacturers (KAM)**, WWF, businesses, recyclers and entrepreneurs, this session will explore how EPR can become an enabler of circularity, innovation and investment rather than simply a compliance obligation.

Kenya's National Communications Strategy for Waste Segregation at Source

6

This session introduces Kenya's five-year National Communications Strategy, designed to drive behavior change and implement the Sustainable Waste Management Act 2022.

The strategy supports a nationwide campaign to eliminate open dumping and strengthen compliance. Participants will explore the three-bin system, biodegradable organic-waste bags, stakeholder roles, audience mapping, and county logistics. The session will show how coordinated communications can transform Kenya's waste value chain and advance a self-sustaining circular economy.

11th Circular Economy Conference | How it Works

Target participants

Entrepreneurs and SMMEs

Corporates and industry leaders

Policymakers and development agencies

Researchers and practitioners

Community organisations and informal sector actors

Youth and innovators

The conference intentionally brings together **diverse actors across the system** to enable real collaboration.

What to Expect

New **cross-sector partnerships and collaborations**

Practical **circular business models and pilots**

Increased **visibility of local innovations and entrepreneurs**

Actionable **campaigns and initiatives** ready for implementation

Stronger **regional networks focused on circularity in practice**

Conference Approach & formats

- **Repair & Remake Workshops**
Hands-on sessions to fix, rebuild, and extend product lifecycles.
- **Material Matchmaking Sessions**
Facilitated exchanges linking businesses around material streams and by-products.
- **Campaign Creation Labs**
Co-develop practical campaigns that participants can implement immediately.
- **5-Minute "One Sentence" Conversations**
Fast, focused exchanges to pitch needs, ideas, or collaborations.
- **Harvest Tables**
Shared meals featuring indigenous and local foods, fostering informal dialogue and connection.
- **Circularity Labs**
Interactive spaces for prototyping solutions and testing business ideas.
- **Find-Your-People Networking**
Curated sessions connecting participants based on shared challenges and opportunities.
- **Open Dialogues ("Conversations with Frank")**
Honest, jargon-free discussions focused on real-world experiences and solutions.

Sponsors and Collaborators | Partnership Opportunities

Any partnership opportunity can be **tailored to the need and budget of the organisation**.

Sponsorships **in kind** which will cover event costs are very welcome.

We would like to keep the ticket price as low as possible to keep the **event inclusive and accessible to all**, as this is not a commercial event.

As such we are looking for amazing sponsors to assist us with **making this event a success**.

This platform enables you to:

- **Access real local innovation and entrepreneurs**
- **Identify new supply chain and business opportunities**
- **Position your organisation as a leader in practical circularity**
- **Build partnerships that go beyond the event**
- **Support visible, measurable local economic impact**

Circular Space Partner Euro 10,000

Provide a venue or adaptive space that hosts workshops, labs, or demos.

Impact: Your space becomes a **living circular hub**

Creative Partner Euro 3,000

Provide designers, decorators, photographers, videographers, audio engineers

Impact: Makes the event **memorable, immersive, and shareable**

Exhibition Partner Euro 10,000

Sponsor or bring **real, interactive solutions**—products, prototypes, demos

Impact: Participants **see, touch, and experience** circular innovation

Organisational Partner Euro 1,000 – 25,000

Support the **operational backbone**—staff hours, logistics, coordination

Impact: Ensures **smooth execution and measurable results**

Experience Partner Euro 10,000

Fund F&B, **hands-on labs, harvest tables, experiential stations**

Impact: Supports **participant engagement, networking, and local suppliers**

“Don’t just sponsor. Make it happen.”

The future of circularity in Africa is local, practical, and collaborative. This conference is where it starts to take shape.

Sponsorship Value

Sponsors will receive:

- Strategic visibility within a **highly targeted ecosystem**
- Direct access to **deal flow and collaboration opportunities**
- Opportunities to **host sessions, labs, or challenges**
- Brand alignment with **action, innovation, and local impact**

SUSTAINABLE INCLUSIVE BUSINESS

Sustainable Inclusive Business Kenya is a knowledge Center established through a fruitful partnership between the Kenya Private Sector Alliance (KEPSA) and MVO Nederland with the support of the Embassy of the Kingdom of the Netherlands in Kenya. SIB-K spearheads the adoption of sustainable and circular business practices in Kenya through impactful knowledge-sharing and strategic collaborations.

KENYA PRIVATE SECTOR ALLIANCE

The Kenya Private Sector Alliance (KEPSA) is the apex body for the private sector in Kenya. KEPSA brings together local and foreign business associations, federations, chambers of commerce, professional bodies that are sectoral umbrella bodies, and individual sectoral business membership organizations, corporates, from multinationals to large and medium-sized companies, SMEs, and start-ups from all sectors of the economy, across all parts of the country.

This gives KEPSA a reach of over 2 million businesses directly and indirectly. KEPSA also serves as the national focal point of the East Africa Business Council (EABC), the umbrella body of businesses in East Africa. It hosts the International Chamber of Commerce (ICC) Kenya Chapter, a member of the ICC with a reach of over 45 million businesses globally.

KENIA PLASTICS PACT

The Kenya Plastics Pact is an ambitious, collaborative initiative that brings together stakeholders across the whole plastics value chain to transform the current linear plastics system into a circular economy for plastics. All stakeholders involved sign up to a joint set of ambitious and time-bound targets, ensuring that this collaboration will drive significant change by 2030. Progress will be monitored and publicly reported every year. Collective efforts and targets will speed up the transition.

THEROCKGROUP

The Rock Group (TRG) is an ambitious agency driving the transition towards a sustainable economy and society. We believe that fair and sustainable business can and should accelerate this transition. Therefore, we work on entrepreneurial solutions with innovators, companies, civil society, knowledge institutes, and policymakers.

TRG has decades of experience in supporting businesses with their Sustainability Strategy, ESG, Compliance, Impact Measurement and Improvement Plans, Materiality Matrices, development of new sustainable businesses, and sustainability education (academia, master's).

El Vaso Glassware

El Vaso Glassware is a pioneering Kenyan eco-enterprise based in Langata, Nairobi, specializing in **sustainable glass upcycling**. By intercepting discarded bottles destined for landfills, the company expertly cuts and refines waste into high-quality, functional glassware products, including cups, jars, and customized drinkware.

El Vaso offers commercial glass-cutting services alongside its retail collections. Driven by environmental stewardship, the brand empowers local communities through green job creation, transforming waste management challenges into elegant, sustainable design solutions for modern homes and businesses.

Nyangorora Banana Processors

Nyangorora Banana Processors Limited (NBP) is a Kenyan agribusiness based in Nyamira County that **transforms bananas into high-value products** through a pioneering circular economy model.

Founded in 2006, NBP has grown from a farmer field school into a leading processor supporting thousands of smallholder farmers across the Gusii region. Through its Ritoke brand, the company produces banana crisps, flour, juices, wines, vinegars, and baked goods.

Committed to zero-waste manufacturing, NBP converts banana by-products into animal feed, fertilizer, fuel briquettes, and textile fibers. By reducing post-harvest losses, creating jobs, and empowering women and youth, NBP drives sustainable rural development.

FiberText Green Paper

Fibertext Green Paper Limited is a Kenyan green manufacturing company that upcycles banana agricultural waste into sustainable, biodegradable paper and molded fiber packaging solutions. We are committed to advancing the circular economy by transforming agricultural residues into eco-friendly alternatives to single-use plastics while creating value for farmers and promoting environmental sustainability.

Kijiweni Uplift Youth CBO

Founded in 2022 in Mombasa, Kenya, Kijiweni Uplift Youth CBO is a youth-led organization dedicated to empowering vulnerable populations through sustainable economic and social initiatives. They serve marginalized groups including women, youth, refugees, and persons with disabilities—by focusing on three core pillars: Climate Action, Community Well-being, and Culture, Arts & Innovation.

Through practical skills training, green entrepreneurship, and safe community spaces, we actively tackle unemployment, poverty, and environmental degradation. Guided by our core values of sustainability, equity, and empowerment, Kijiweni strives to build a thriving, resilient community capable of driving its own socio-economic transformation.

Kwale Recycling Centre

Kwale Recycling Centre (KRC) is a registered community-based organization and social enterprise in Kwale County that promotes sustainable waste management and the circular economy. KRC collects, sorts, and **processes recyclable materials, including PET and HDPE plastics and glass**, while engaging communities to improve waste segregation and recovery. The Centre also converts organic waste into organic fertilizer, creating value from waste and supporting agriculture. Through waste collection, processing, recycling, and community outreach, KRC helps reduce pollution, increase resource recovery, and strengthen circular economy practices. Its goal is to enhance sustainable waste management across Kwale County and the wider coastal region

Muafrika Eco Nishati Ltd

Muafrika Eco Nishati Ltd is a Kenyan green enterprise driving clean energy, sustainable mobility, and circular economy solutions. They transform locally available resources into economic and environmental value through two core ventures: **100% Coconut Charcoal Briquettes**, made from coconut shells and biomass waste using natural cassava starch for a cleaner, renewable alternative to conventional charcoal; and **100% Electric Three-Wheeler Mobility**, offering affordable, reliable, zero-emission e-TukTuks for transport and business use.

By merging waste-to-energy with e-mobility, we reduce deforestation, pollution, and fossil fuel dependence while creating inclusive jobs for youth and women across production, distribution, and servicing.

Kibmist Enterprises Limited

Kibmist Enterprises Limited is a Kenyan climate-smart agribusiness that transforms organic waste into high-value soil health solutions. The company **produces vermiliquid fertilizer, granulated vermicompost, agricultural biochar, and tree seedlings** to improve soil fertility, increase farm productivity, and strengthen climate resilience.

Through vermiculture, farmer training, extension services, and market linkages, Kibmist connects sustainable waste management with agriculture, turning waste into wealth. Operating across the 14 LREB counties, the enterprise empowers smallholder farmers, cooperatives, women, and youth. Guided by sustainability, innovation, and inclusion, Kibmist advances food security, climate action, and income generation while building resilient communities and healthier ecosystems.

Organic Fields Limited

Organic Fields is a Kenyan social-environmental enterprise advancing sustainable agriculture by transforming municipal food waste into high-quality organic fertilizers. Through nutrient recycling and soil carbon sequestration, we help farmers improve soil health while reducing environmental waste. Serving over 8,600 farmers nationwide, our innovative products—**Hygrow Organic, Biodama Bio Fertilizer**, Champion Organic Foliar Fertilizer, and Organic Copper Power—offer cost-effective, eco-friendly alternatives to conventional inputs.

By converting waste into valuable resources, Organic Fields boosts farm productivity, enhances soil fertility, and supports certified organic and natural growers, contributing to environmental conservation and resilient, sustainable food systems across Kenya.

Progreen innovations

Progreen Innovations Limited is a pioneering Kenyan **waste-to-energy enterprise** dedicated to transforming environmental liabilities into valuable assets. Guided by the motto “We transform waste into value”, they engineer sustainable energy and circular materials that reduce fossil fuel dependency, combat climate change, and protect ecosystems. their advanced recycling infrastructures convert urban plastic and organic waste into three core solutions: Alternative Liquid Fuels (**eco-diesel and petrol** for machinery and generators), Heating Blocks (smokeless biomass replacements for charcoal and firewood), and **Eco-Bricks** (durable construction materials from non-recyclable plastics).

Rafiki PEPS

Rafiki PEPS is a youth-led waste management and circular economy enterprise based in Mombasa, Kenya. We provide waste collection, source segregation and recovery services to households, businesses and learning institutions. We work with communities and recycling partners to divert recyclable and organic waste from disposal, create green jobs and promote responsible waste management.

Riagah Green Cycle

Riagah Green Cycle is a Nairobi-based social enterprise specializing in plastic and paper waste recycling. We collect, sort, and process post-consumer waste, transforming it into valuable recycled materials such as polythene pellets and black sheeting for use in manufacturing, agriculture, construction, and packaging.

By partnering with households, businesses, waste collectors, and informal pickers, we build efficient recovery networks that divert waste from landfills and the environment. Our model promotes cleaner communities, resource conservation, and circular economy practices while creating income opportunities for women and youth. Riagah Green Cycle turns discarded materials into sustainable products and livelihoods..

Rilly's Leather Enterprises

Rilly's Leather Enterprises Limited is a **Kenyan leather manufacturing and innovation** company based in Kisii County. With a team of about 15 employees, we design and produce quality leather products including shoes, belts, wallets, and bags for everyday and specialized markets. Their inclusive manufacturing approach creates customized footwear for people with disabilities, blending craftsmanship with practical innovation. We also pioneer circular economy solutions through fish leather, converting discarded fish skins into durable materials for sustainable fashion and accessories.

Rilly's is committed to resource efficiency, inclusive design, and value addition—transforming local resources into globally relevant, sustainable leather products.

Silverlink Manufacturing

Silverlink Manufacturing Limited is a plastic waste recycler established in the year 2015 in Syokimau. The company produces durable, cost effective recycled plastic poles as an eco friendly alternative to traditional wooden poles for fencing, agriculture, real estate, road signage, and landscaping. It's products help reduce plastic waste, combat deforestation, minimize vandalism and costs, promote green innovation and create employment.

Victoria Agrotech Ltd

Rafiki PEPS is a youth-led waste management and circular economy enterprise based in Mombasa, Kenya. We provide waste collection, source segregation and recovery services to households, businesses and learning institutions. We work with communities and recycling partners to divert recyclable and organic waste from disposal, create green jobs and promote responsible waste management.

Soldier Fly Diverse

Soldier Fly Diverse Limited is an agritech company specializing in Black Soldier Fly (BSF) bioconversion. We partner with farmers, food processors and municipalities to turn organic waste into two valuable products: high-protein BSF ingredients for animal feed and frass biofertilizer that restores soil health. Our solutions lower input costs, reduce landfill pressure and unlock circular value for East Africa's agriculture since 2022.

Kijiji Solutions Youth Initiative (KSYI)

Kijiji Solutions Youth Initiative (KSYI) is a youth-led community-based organization founded in April 2024 in Gatwekera, Kibera, Nairobi, Kenya. Guided by the motto "Reclaim. Rebuild. Renew.", KSYI empowers young people and communities to lead sustainable change through innovative solutions in WASH, circular economy, urban agriculture, sports for education, and youth livelihoods. Through initiatives such as the Mlango Ndogo WASH Centre, Kijiji Reclaim, Kijiji Skill Lab, Kijiji Gardens, and Kijiji Haven, KSYI creates opportunities for environmental conservation, skills development, income generation, and community resilience. Our goal is to build community-owned systems that deliver lasting social, economic, and environmental impact.

Carbon Removal Kenya Association

Carbon Removal Kenya Association (CRK) is the industry association for technology-based carbon removal developers in Kenya. We bring together companies working across emerging carbon removal pathways such as direct air capture, biochar, enhanced rock weathering, concrete mineralization and geological storage to build a credible, high-integrity sector that is grounded in evidence, local capacity and responsible innovation. CRK is helping position Kenya as a trusted emerging hub for carbon removal in Africa and beyond through research, technical exchange, member services, policy engagement and strategic partnerships.

AfroWema

AfroWema is a Nairobi-based sustainable social impact fashion brand founded in 2023 that merges contemporary African artistry with mindful, heritage-rooted craftsmanship. Handcrafted entirely by artisans and youth in Kibera, Nairobi, each piece reimagines "goodness" (Wema) by transforming reclaimed denim, upcycled textiles, and vibrant local prints into premium, zero-waste luxury garments. Led by founder and creative director Tatiana Teixeira, the brand champions circular fashion, fair-wage employment, and cultural preservation. AfroWema's globally recognized designs—including its award-winning Savage Beauty Heritage and UHAI collections—have been showcased from local runways to Circular Sustainable Fashion Week Madrid, seamlessly uniting environmental responsibility with bold, timeless style.

Nazava Water Filters

Nazava Water Filters is an award-winning social enterprise that manufactures and distributes highly affordable, World Health Organization (WHO)-certified ceramic water purifiers designed for low-income households. Designed in the Netherlands, these gravity-driven filtration systems empower families to turn raw water from tap, well, borehole, rain, or river sources into 100% pathogen-free, safe drinking water without the need for boiling or buying expensive bottled alternatives.

Bopinc Kenya

Bopinc Kenya is part of a global network that accelerates inclusive business models to improve the lives of low-income communities. Based in Nairobi, the organization works alongside entrepreneurs, corporations, and development partners to design, test, and scale commercially viable solutions in the circular economy, green technology, and sustainable agriculture. Bopinc Kenya is committed to bridging gender gaps and enhancing market readiness, ensuring that emerging businesses across the region drive equitable, climate-resilient economic growth.
